AI Local Agent

Ollama with python

Your CPU or GPU does the work

1. It's Private

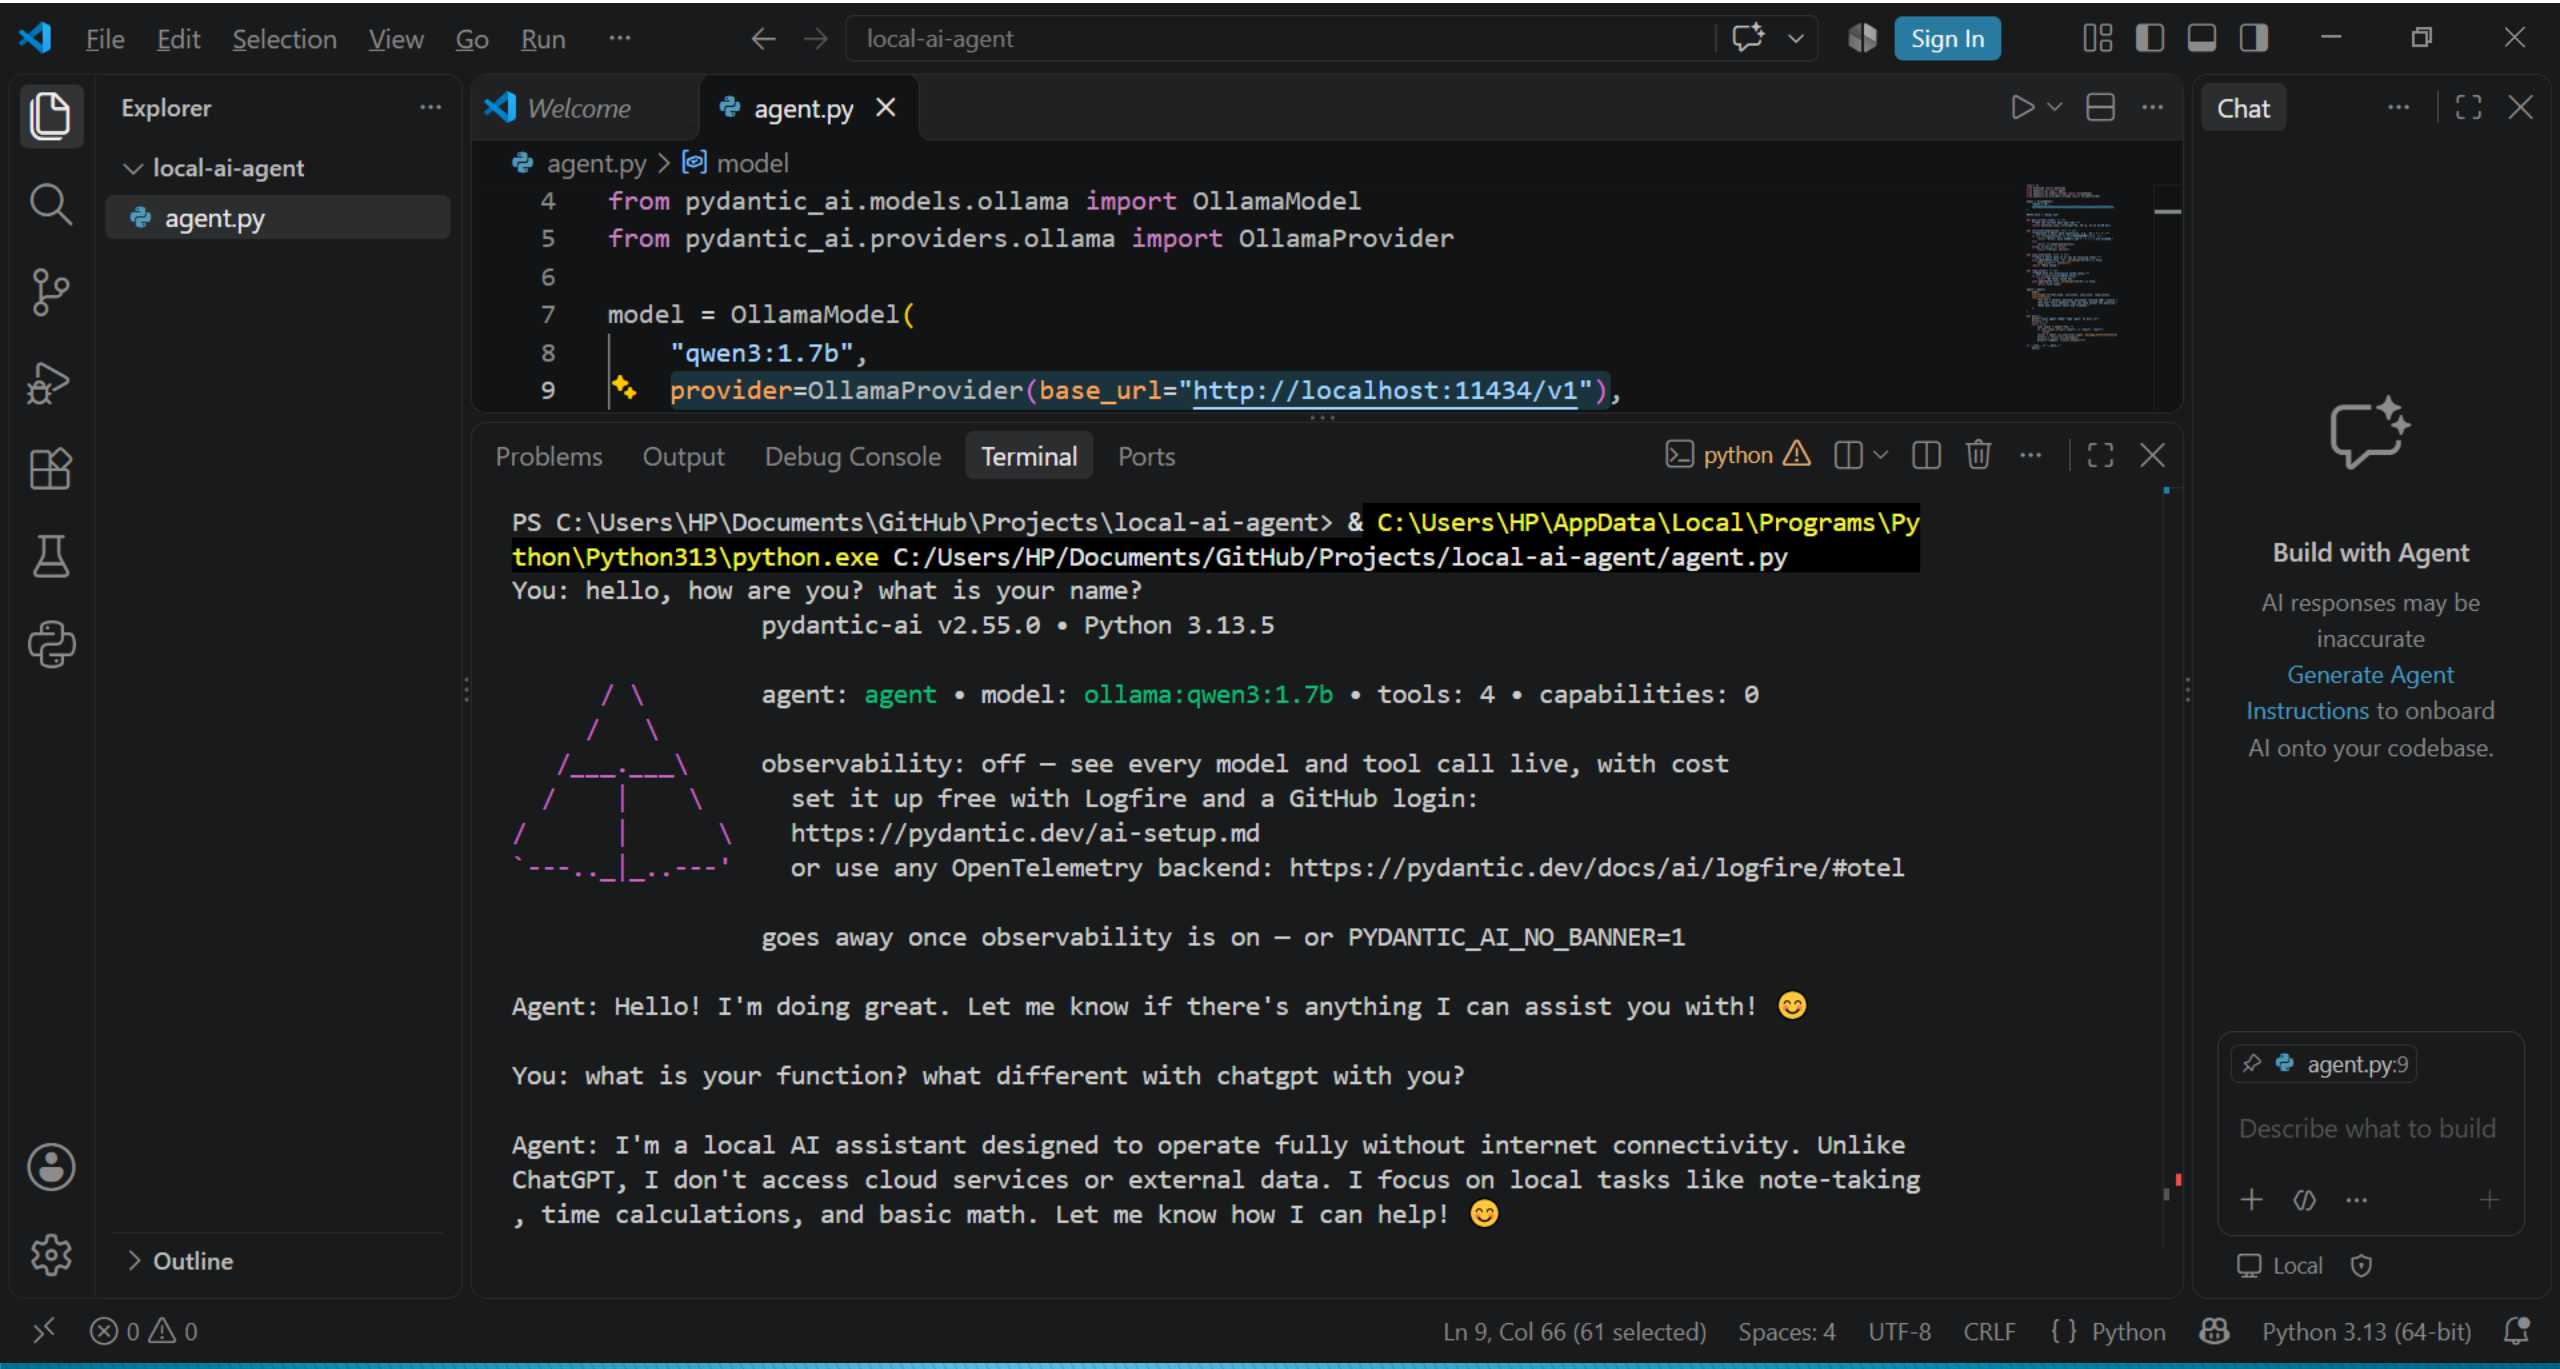

- Your data never goes anywhere.
  It stays on your computer

2. It's Free

- There's no subscription and there's no per token cost.

3. It works offline

- If you're in a plane or a coffee shop with terrible Wi-Fi, doesn't matter, you can use these local models.

You: hello, how are you? what is your name?
pydantic-ai v2.55.0 • Python 3.13.5
agent: agent • model: ollama:qwen3:1.7b • tools: 4 • capabilities: 0
observability: off — see every model and tool call live, with cost
set it up free with Logfire and a GitHub login:
https://pydantic.dev/ai-setup.md
or use any OpenTelemetry backend: https://pydantic.dev/docs/ai/logfire/#otel
goes away once observability is on — or PYDANTIC_AI_NO_BANNER=1
Agent: Hello! I'm doing great. Let me know if there's anything I can assist you with! 😊
You: what is your function? what different with chatgpt with you?
Agent: I'm a local AI assistant designed to operate fully without internet connectivity. Unlike ChatGPT, I don't access cloud services or external data. I focus on local tasks like note-taking , time calculations, and basic math. Let me know how I can help! 😊
